

Overland Park Regional MEDICAL CENTER

HOSPITAL FEATURES:

- Level II Regional Trauma Center
- Accredited Chest Pain Center with Percutaneous Coronary Intervention (PCI)
- Level IIIb Neonatal Intensive Care Unit (the highest level of care for premature or sick infants in Johnson County), including a Neonatal Transport Team.
- The Women's Center offers services including advanced infertility, high-risk perinatology and cardiology, urogynecology, and surgery for mother/fetus.
- The Human Motion Institute for musculoskeletal diagnosis and treatment.
- Cardiology Services including open heart surgery, cardiac catheterization and cardiac rehabilitation.

Overland Park Regional Medical Center is one of the premiere medical facilities in Johnson County. The hospital is a licensed 343-bed facility offering acute and outpatient medical care services to the Overland Park community and the surrounding areas since December of 1978. The hospital campus features four medical office buildings, two pharmacies and the offices of more than 100 physicians.

Our services include Emergency Services, a Regional Trauma Center, an Accredited Chest Pain Center, The Women's Center with Level IIIB NICU, the Human Motion Institute, advanced diagnostic imaging, a Diabetes Center and many other specialty care services. We offer the latest in technological advances and we are committed to providing every patient with the highest level of care in an environment where people, compassion, community and integrity are valued.
