Since its founding in 1978, Overland Park Regional Medical Center has grown to reflect the changing needs of the community it serves. Located at I-435 and Quivira Road in Overland Park, Kansas, this acute care hospital offers the only nationally accredited Level II Trauma Center and Level IIIb Neonatal Intensive Care nursery in Johnson County. In 2012, Overland Park Regional broke ground on a historical $110-million hospital expansion, pictured in the rendering above. Our renovations will include a new patient tower, a state-of-the-art Emergency Department and Trauma Center and a new Women's Center entrance.
As a community hospital, Overland Park Regional Medical Center has a primary goal; to meet the healthcare needs of our neighbors, friends and family members and to provide every patient with the highest level of service and care. We strive to make the communities we serve healthier because of our quality, humanity and partnership.

Our mission is simple: Together we touch life. As we work to ensure that the people of our community receive quality care, with a focus on physical enrichment and emotional healing, we are mindful of our partnerships and serving those who need us most. Our recent community partnerships include: the Health Partnership of Johnson County, the American Heart Association Heart Walk, the Community Blood Center Blood Drive, Golf For Babies, Making Strides Against Breast Cancer, WIN for KC Women’s Triathlon, and Wonderscope Children’s Museum.

Together, we touch life … through physical enrichment and emotional healing.

A proud member of the Overland Park community, providing excellent patient care and meeting the needs of Johnson County and surrounding areas for more than 30 years.

Overland Park Regional Medical Center offers a powerful blend of exceptional expertise, advanced technology and quality care.

ACCREDITED CHEST PAIN CENTER
– 24/7 access to emergency heart care, including the most advanced heart diagnostic and treatment tools, which means a better chance for survival and recovery.

AREAS MOST ADVANCED NICU – A Level III Neonatal NICU, including highly trained physicians and staff, with special expertise and technology to care for premature or critically ill infants.

CERTIFIED PRIMARY STROKE CENTER – Expert diagnosis and treatment of the brain and nervous system, including comprehensive care of patients suffering from stroke.

COMPREHENSIVE CARE FOR WOMEN – Advanced care for women through all stages of life including a range of reproductive and fertility services, the area’s only high risk pregnancy center, and a dedicated center for women’s surgery.

HUMAN MOTION INSTITUTE -
Offers the latest services and techniques to prevent and address injuries and conditions affecting bones, joints and muscles, from general back pain to fibromyalgia.

LEVEL II TRAUMA CENTER – A designated trauma center for the state of Kansas, with board certified physicians and highly trained staff to care for the most life-threatening injuries.

Overland Park Regional Medical Center, part of HCA Midwest Health System, is a licensed 350-bed facility offering acute and outpatient medical care services and over 700 physicians on staff, covering virtually every medical specialty. Our physicians provide expertise in fields such as trauma and emergency care, cardiology, women’s medicine, advanced infant care and neonatology, neurology and others. Our hospital complements this expertise with advanced technology, a highly trained clinical staff and compassionate, hands-on patient care.

Our facility has also received the Get With the Guidelines Stroke-Silver Performance Achievement Award from the American Heart Association and American Stroke Association.

The Breast Center at OPRMC is accredited by the National Accreditation Program for Breast Centers (NAPBC), which is administered by the American College of Surgeons. Accreditation by the NAPBC is only given to those centers that have voluntarily committed to provide the highest level of quality breast care and that undergo a rigorous evaluation process and review of their performance.

Overland Park Regional Medical Center was named one of the nation’s top performing hospitals on key quality measures by The Joint Commission, the nation’s leading accreditor of health care organizations.
